Risk Communication and Community Engagement Outbreak Readiness Training for Major Disease Outbreak Responses - South Sudan

The READY initiative is welcoming applications from individuals operating in South Sudan for an upcoming *Risk Communication and Community Engagement (RCCE) Readiness Training for Major Disease Outbreak Responses*. This **five-day training** in Juba, South Sudan aims to strengthen technical and operational leadership to plan and execute RCCE readiness and response in large-scale outbreaks with considerations for humanitarian contexts.

SYNOPSIS

When major disease outbreaks occur, non-governmental organizations (NGOs) are often on the front-lines, using their deep connections with affected communities and expertise to support outbreak readiness and response. To be able to control these outbreaks effectively, NGOs are increasingly encouraged to be ready to drive a more participatory, community-led response that facilitates behavior change with data-driven communication.

In this training program, developed and facilitated by the USAID/BHA-funded READY initiative, individuals will learn how to strengthen their skills to design an effective community-centered RCCE plan and identify operational readiness actions required to execute that plan in humanitarian settings.

COST & COMMITMENT

Program Fee: \$0

While there is no training program fee, selected individuals will need to commit to completing two online (eLearning) courses and attend the five-day training to participate. READY will provide breakfast, tea breaks, and lunch for all five days of training. READY has limited funding available to support travel costs for local/national organizations and lodging for anyone traveling from outside of Juba who needs it. Funding will be considered on an as-needed basis based on requests. Please indicate support requests on the [application form](#). READY will discuss expected commitments with individuals during the selection process.

DELIVERY METHODS

- Pre-requisite online (eLearning) courses
 - *Introduction to Infectious Disease Outbreaks In Humanitarian Settings* (Required)
 - *Introduction to RCCE In Humanitarian Settings* (Required)
 - *Participatory Community Engagement during Major Disease Outbreaks in Humanitarian Settings* (Optional)
 - *Data Collection, Analysis, and Use for RCCE during Infectious Disease Outbreaks in Humanitarian Settings* (Optional)
- Five days in-person training sessions (September 30 - October 4th in Juba, South Sudan)

TRAINING OBJECTIVES

By the end of the training, individuals will be able to:

-  Design an effective community-centered RCCE plan for a major disease outbreak.
-  Identify the operational readiness actions required to execute that plan in humanitarian settings.

TRAINING OVERVIEW

In this training, an evolving outbreak scenario in a humanitarian setting will introduce a range of challenges that will need to be solved during interactive exercises throughout five days of in-person sessions. During these exercises, learners can apply what they have learned to prioritize operational readiness actions and develop strategic response plans. READY developed these

modules based on the [Communicating with Communities in Epidemics and Pandemics: RCCE Readiness Kit](#), which includes actions and operational and technical tools to support NGOs and humanitarian actors to strengthen readiness to respond to outbreaks with RCCE, and to have a more community-centered approach across sectors.

LEARNING THE BASICS:

Two weeks prior to face-to-face training

- Complete two required online (eLearning) courses that provide the basics on outbreak response and RCCE with considerations for humanitarian settings
 - i. *Introduction to Infectious Disease Outbreaks in Humanitarian Settings* (Required)
 - ii. *Introduction to RCCE in Humanitarian Settings* (Required)
 - iii. *Participatory Community Engagement during Major Disease Outbreaks in Humanitarian Settings* (Optional)
 - iv. *Data Collection, Analysis, and Use for RCCE during Infectious Disease Outbreaks in Humanitarian Settings* (Optional)

RISK COMMUNICATION AND COMMUNITY ENGAGEMENT TRAINING PROGRAM:

*Five days in-person training sessions
(September 30 - October 4, 2024)*

- The goal of this training is to strengthen RCCE leadership to drive a more participatory, community-led response in large-scale outbreaks, and facilitate behavior change with data-driven communication. The training will include interactive exercises that link to an evolving outbreak scenario in a humanitarian setting, allowing learners to apply what that have learned and reflect on operational considerations. thematic content will include: social and behavior change in outbreaks, data collection and analysis, community-led community engagement, managing uncertainty and rumors, multi-source listening, readiness actions, simulation exercises to test outbreak response knowledge and skills, and more.

WHO IS THIS TRAINING FOR?

Priority audience for workshop participants includes individuals that work for a national, local, and international NGO that is operating in South Sudan; government and UN representatives are also encouraged to apply. Applicants in the region that are not based in South Sudan will be considered on a case-by-case basis.

Individuals should have the following attributes:

- Holds a current or future role in planning, managing, and/or executing communication, behavior change and/or community engagement readiness and response to large-scale outbreaks.
- Actively seeks to add or strengthen RCCE technical and operational capacity.
- Has experience working in humanitarian and public health response; a variety of technical sector experts (e.g., WASH, protection, etc.) are encouraged to apply.

Mandatory

- Ability to commit to completing the online eLearning courses and in-person training sessions.
- Ability to participate in written and spoken English

ABOUT READY: GLOBAL READINESS FOR MAJOR DISEASE OUTBREAK RESPONSE

In 2018, the United States Agency for International Development's Bureau for Humanitarian Assistance funded Save the Children to lead an initiative to augment global capacity to respond to major disease outbreaks. The READY initiative is ensuring humanitarian NGOs have the tools, knowledge, and skills to support crisis-affected communities and local authorities more effectively in response to major epidemics and pandemics.

This training is made possible by the generous support of the American people through the United States Agency for International Development (USAID). The contents are the responsibility of READY and do not necessarily reflect the views of USAID or the United States Government. Led by Save the Children, the READY initiative is implemented in partnership with the Johns Hopkins Center for Communication Programs and the Humanitarian Leadership Academy.

If you, your staff member, or your organization meet the above selection criteria, please complete the application using this [online form](#). **Applications will be accepted until September 1, 2024.** All applicants will be informed if they have been chosen for the training by September 20, 2024.
